Tied to one condition
CIE colorimetry
Appearance
what it looks like
Material
what it is made of
No curves
weighted mixes of the three responses
XYZ or cone values
or camera RGB, for one observer and one light
Sharpened cones
divided by white: the waypoint inside a CAT
Wpt
one normalization per observing condition
More uniform
distance works as a color difference
CIELAB, ΔE00
one light, one standard observer
CAM02-UCS, CAM16-UCS
how different colors look to an adapted viewer
WLab, ΔEWLab
how far apart materials are
